CAREER PROFILE

Healthcare IT Infrastructure Specialist transitioning into cybersecurity with 6 years of experience protecting critical systems and patient data. Deep understanding of clinical workflows, HIPAA compliance requirements, and the unique security challenges facing healthcare organizations. Proven track record maintaining 99.9% uptime across 9 hospitals and 100+ outpatient facilities while implementing security controls, vulnerability management, and identity access management protocols. Seeking to leverage hands-on infrastructure experience and healthcare domain knowledge to defend against evolving cyber threats in a Cybersecurity Analyst or Healthcare Information Security role.

CORE COMPETENCIES

- Vulnerability Management & Patch Management
- HIPAA Security Rule & Healthcare Compliance
- Active Directory & Windows Server Security
- Risk Assessment & Security Auditing
- Identity & Access Management (IAM)
- Incident Response & Disaster Recovery
- Network Security & Segmentation
- Cloud Security (AWS)

PROFESSIONAL EXPERIENCE

Application Administrator

University of Rochester Medical Center (URMC) | Rochester, NY | Sep 2024 - Present

- Execute security and vulnerability patching on Linux and Windows servers across 9 hospitals and 100+ outpatient locations, maintaining HIPAA-compliant infrastructure with zero security incidents
- Manage identity and access management (IAM) lifecycle including user provisioning/de-provisioning, role-based access control (RBAC), and privileged access management for clinical and business applications
- Implement ITIL Change Management processes with security-focused risk assessment, ensuring all production changes include rollback procedures and security impact analysis
- Conduct security audits and compliance verification for HIPAA Security Rule requirements, supporting annual risk assessments and regulatory examinations
- Perform disaster recovery testing and business continuity planning, validating data integrity and system availability for critical healthcare applications
- Analyze system security metrics via PostgreSQL and SIEM tooling to identify anomalies, optimize security controls, and enhance threat detection capabilities
- Collaborate with cross-functional teams to ensure secure system integrations, implementing zero trust principles for vendor access and third-party connections

Help Desk Analyst

University of Rochester Medical Center (URMC) | Rochester, NY | Jul 2023 - Sep 2024

- Responded to security incidents and potential phishing reports, performing initial triage and escalating to security teams per incident response protocols
- Resolved escalated security-related tickets including account lockouts, MFA issues, and access violations while maintaining audit trails
- Created 30+ knowledge base articles on security procedures, troubleshooting steps, and escalation protocols, reducing mean time to resolution by 25%

- Trained new hires on security awareness, password policies, and HIPAA privacy requirements, fostering a culture of security consciousness
- Identified and reported suspicious network activity and potential security threats, contributing to early threat detection efforts

Computer Science Lab Manager

Concordia University Irvine | Irvine, CA | Jan 2021 - May 2022

- Administered Windows Server and Ubuntu LDAP infrastructure, implementing security hardening, patch management, and access controls
- Developed automation scripts in Python, Bash, and PowerShell for secure account provisioning, software deployment, and security monitoring
- Managed Active Directory security policies, group policy objects (GPOs), and user authentication mechanisms
- Deployed and maintained workstation security configurations, ensuring endpoint protection and compliance with university security standards

TECHNICAL SKILLS

Security & Compliance:	HIPAA Security Rule, NIST CSF, Vulnerability Management, Risk Assessment, Security Auditing, Incident Response
Identity & Access:	Active Directory, Azure AD, LDAP, RBAC, User Provisioning, SSO, MFA
Systems & Infrastructure:	Windows Server 2016-2022, Linux (Ubuntu), VMware, O365 Administration, Patch Management
Networking:	TCP/IP, DNS, DHCP, VLANs, Firewall Concepts, Network Segmentation
Scripting & Automation:	PowerShell, Python, Bash, Go, Automation, REST APIs
Cloud & DevOps:	AWS (Lambda, EC2, S3), Docker, Git, CI/CD Concepts, Infrastructure as Code
Databases:	PostgreSQL, SQL, MongoDB, Database Security
Tools:	ServiceNow, SIEM Concepts, Wireshark (Basic), Nmap (Basic)

EDUCATION

Bachelor of Science in Computer Science

Concordia University Irvine | Irvine, CA | Aug 2017 - May 2022

- Relevant Coursework: Network Security, Database Management, Systems Administration, Software Engineering

CERTIFICATIONS & TRAINING

- CompTIA Security+ (In Progress - Expected Q2 2025)
- HIPAA Privacy & Security Training (Annual - URMIC)
- ITIL v4 Foundation (Recommended)
- AWS Cloud Practitioner (Recommended)

SECURITY-FOCUSED PROJECTS

Matrix Miles | IoT Fitness Security Project | Go, PostgreSQL, Docker, OAuth 2.0, REST API

- Built secure IoT platform with OAuth 2.0 authentication, API security controls, and encrypted data transmission for fitness data integration

Betrayal Discord Bot | Secure Application Development | Go, PostgreSQL, Docker, Discord API

- Implemented structured logging, command audit trails, and secure database interactions with parameterized queries and connection pooling

Personal Portfolio & Blog | alexmccune.dev

- Documenting cybersecurity learning journey, technical write-ups on security topics, and project showcases demonstrating security best practices
