PROFESSIONAL EXPERIENCE

Application Administrator — *University of Rochester Medical Center, Rochester, NY* (Sep 2024 - Present)

- Orchestrated security patching, system upgrades, and server migrations for clinical applications across 9 hospitals and 100+ outpatient locations on Linux and Windows Server, achieving zero unscheduled downtime and zero clinical impact.
- Instituted ITIL Change Management framework encompassing risk assessment, security impact analysis, and documented rollback procedures for all production changes, reducing deployment incidents and ensuring audit-ready change records.
- Directed full-scope Identity and Access Management (IAM) lifecycle—user provisioning, Role-Based Access Control (RBAC), and Privileged Access Management (PAM)—for clinical applications supporting thousands of healthcare end users.
- Engineered PostgreSQL queries and Power Platform dashboards to analyze system performance metrics, surfacing optimization opportunities that improved application reliability and end-user experience.
- Drove cross-functional system integrations with IT engineering teams, clinical stakeholders, and third-party vendors to resolve complex technical issues and deploy new features across the healthcare network.
- Enforced HIPAA Security Rule compliance through security audits, vulnerability assessments, and remediation; strengthened data protection and access control standards across all managed applications.

Help Desk Analyst — *University of Rochester Medical Center, Rochester, NY* (Jul 2023 - Sep 2024)

- Onboarded and trained incoming help desk agents on ITIL incident management, ServiceNow ticketing, HIPAA privacy requirements, and troubleshooting workflows, accelerating agent readiness and service quality.
- Resolved escalated Tier 2 incidents including network outages, Active Directory authentication failures, system-wide application errors, and undocumented software defects, maintaining sub-15-minute average resolution time.
- Authored 30+ ServiceNow knowledge base articles on system architectures, troubleshooting procedures, and escalation protocols; reduced repeat incident volume and improved first-call resolution rates.

Computer Science Lab Manager — *Concordia University Irvine, Irvine, CA* (Jan 2021 - May 2022)

- Architected and maintained Windows Server and Ubuntu LDAP infrastructure across 50+ lab workstations serving 200+ users; managed security patching, Group Policy Objects (GPOs), access controls, and endpoint protection.
- Developed PowerShell, Python, and Bash automation scripts for secure account provisioning, software deployment, device configuration, and security monitoring, eliminating manual administrative overhead.

Software Engineer Intern — *Collectors, Santa Ana, CA* (Dec 2020 - May 2021)

- Engineered a Python/OpenCV computer vision application to detect and classify damage on 3,000+ collectible trading cards, automating quality assessment and replacing error-prone manual inspection processes.
- Managed source control and CI/CD pipelines through Azure DevOps; designed a PostgreSQL relational database of trading card metadata to support automated identification and classification at scale.

IT Lead Technician — *Concordia University Irvine IT Department, Irvine, CA* (Jan 2018 - May 2022)

- Led and mentored a team of technicians supporting 4,000+ students and faculty; triaged escalated help desk tickets, enforced service quality standards, and reduced average resolution time through coaching and process improvement.
- Performed classroom hardware repairs, network connectivity troubleshooting and resolution, and audio-visual support for university events and fundraisers, ensuring reliable technology operations across campus.

TECHNICAL COMPETENCIES & SKILLS

Systems & Infrastructure: Windows Server 2016–2022, Linux (Ubuntu), Active Directory / Group Policy, LDAP, VMware, Office 365, Endpoint Management, ServiceNow (ITSM & Ticketing)

Cloud & DevOps: AWS (EC2, S3, Lambda), Azure DevOps, Docker, Git, CI/CD Pipelines

Scripting, Automation & Databases: PowerShell, Python, Bash, Go, SQL, PostgreSQL, REST API Integration

Security & Compliance: HIPAA Security Rule, Vulnerability & Patch Management, IAM/RBAC/PAM, Security Auditing, Incident Response, NIST CSF, ITIL Change Management, Disaster Recovery Planning, MFA

Core Competencies: IT Environment Management, Technology Procurement & Vendor Management, Personnel Lifecycle (Onboarding / Offboarding), SOP Development, Stakeholder Communication & End-User Training

EDUCATION

Concordia University Irvine, Irvine, CA — B.S. in Computer Science, Aug 2017 - May 2022

Computer Science Student of the Year, Graduating Class of 2022

CERTIFICATIONS

CompTIA Security+ — CompTIA • **HIPAA Privacy & Security Training** — UPMC (Annual)
